

### What are the yields we want?

Exemples:

- Food for humain and animals
- Resting area
- Seeds for the neighborhood
- Some colors or textures
- Materials

### How the environnement of this ecosystem live?

3  
4  
5

- What are the energetic ressources uses?  
(Rain, sun, wind...)
- What services gives the principals actors in this system?  
(Food, homes, transport, communities, cleaner...)
- Who would be the principals actors who allow the production of the yields chosen and make the system live?

### Draw an ecosystem from the nature

In nature, the borders (mountain-plain, salty-clean currents, cliff-empty...) are generally very rich in biodiversity
